OnlyCoin Whitepaper

Version 1.0\ **Date:** June 2025\ **Chain:** Binance Smart Chain (BEP-20)

Executive Summary

OnlyCoin is a next-generation meme-driven token that aims to fuse the best elements of successful crypto projects like Dogecoin (community power), Shiba Inu (ecosystem development), Solana (speed and scalability), Chainlink (real-world utility), and Uniswap (decentralized trading) into a single project built for the Web3 era. Positioned at the intersection of meme culture and utility, OnlyCoin seeks to empower creators, fans, and DeFi participants by providing real value beyond speculation.

Introduction

Crypto markets thrive on narrative. OnlyCoin embraces this fully — but rather than offering empty hype, it delivers a product roadmap and utility rooted in engagement, transparency, and scalability. By mimicking the emotional resonance of meme tokens and fusing that with the structural rigor of successful layer-1s and DeFi platforms, OnlyCoin becomes more than just a coin — it's a movement.

Token Overview

- **Token Name:** OnlyCoin
- **Symbol:** OnlyCoin
- **Type:** BEP-20 (Binance Smart Chain)
- **Decimals:** 18
- **Total Supply:** 1,000,000
- **Ownership:** Renounced
- **Liquidity:** Locked until September 2025

Token Utility

OnlyCoin will serve several clear functions:

- **Tipping & Microtransactions:** Integrated with content platforms, fans can tip creators directly with OnlyCoin.
- **Staking & Yield Farming:** Holders will be able to earn passive rewards through staking.
- **Governance:** Token holders vote on future utilities and integrations.
- **Trading:** Tradeable on PancakeSwap and future CEXs.
- **NFT Integration:** Used for minting, accessing, or unlocking creator-specific NFT content.

Inspired by Giants

OnlyCoin draws from:

- **Dogecoin:** Simplicity and viral community momentum
- **Shiba Inu:** Gradual ecosystem rollout and token burns
- **Solana:** Focus on scalability and low-fee transactions
- **Chainlink:** Real-world application potential (future API integrations for creators)
- **Uniswap:** Permissionless decentralized trading and liquidity provision

---

Technical Architecture

- **Blockchain:** Binance Smart Chain
- **Smart Contract:** Verified and published on BscScan
- **Contract Address:** 0xC0912c990fe376Bc74776b79BAf28456dAdDC055
- **Gas Fees:** Low-cost, BNB-based
- **Audit:** Community audit in progress; external audit planned for Q3 2025

Roadmap

Q2 2025

- Token deployment
- Website and branding live
- PancakeSwap liquidity creation
- LP locked via Mudra
- Community building begins

Q3 2025

- CoinGecko and DEXTools listings
- Staking dashboard goes live
- Social campaigns and influencer partnerships
- TipJar system (OnlyCoin tipping bot)

Q4 2025

- NFT integration
- Beta launch of creator dashboards
- Mobile-friendly wallet & dApp access

2026+

- Cross-chain expansion

- Full DAO launch
- CEX listings

Security & Transparency

- **Liquidity Locked:** Yes (via Mudra until Sept 2025)
- **Contract Verified:** Yes (BscScan)
- **Team Transparency:** Community-driven leadership
- **Open Source Code:** GitHub repo available
- **Audit:** Community-based, with formal audit scheduled

Conclusion

OnlyCoin isn't just another meme coin — it's a hybrid of virality and vision. Drawing wisdom from the most impactful projects in crypto, OnlyCoin is built to grow, adapt, and engage. Whether you're a trader, content creator, or simply a believer in the future of decentralized social economies — this is your coin.
